

N100 Financial Intelligence - Sprint 6 Acceptance Checklist

Final Day 45 validation. Statuses reflect the actual project artifacts and test results.

Gate	Acceptance gate	Status	Evidence / notes
AC-01	Full pytest suite	PASS	154 passed, 0 failures
AC-02	Python compilation	PASS	compileall completed successfully
AC-03	KMeans companies	PASS	92 unique companies
AC-04	KMeans clusters	PASS	5 clusters assigned
AC-05	Cluster missing values	PASS	No required missing values
AC-06	Cluster profiles	PASS	5 profile rows
AC-07	Correlation analysis	PASS	10 KPI correlation matrix
AC-08	Sector outliers	PASS	92 company rows
AC-09	Portfolio statistics	PASS	5 KPI statistic rows
AC-10	API health	PASS	HTTP 200, database OK
AC-11	Company APIs	PASS	Company list/profile endpoints verified
AC-12	Financial APIs	PASS	PL, BS, cashflow and ratios verified
AC-13	Screener APIs	PASS	Base and filter requests verified
AC-14	Sector APIs	PASS	10 actual sectors verified
AC-15	Peer APIs	PASS	56 peer groups; compare verified
AC-16	Market and documents APIs	PASS	Market-cap, portfolio stats and documents verified
AC-17	Tearsheet generation	EXCEPTION	92 generated; exactly 2 pages each; files are below 30KB
AC-18	Sector reports	EXCEPTION	10 reports match actual database sectors; specification mentioned 11
AC-19	Dashboard	PASS	8 Streamlit screens verified
AC-20	Performance and concurrency	PASS	35/35 concurrent requests succeeded; screener about 190 ms

Quality notes: Black formatting check passed. Ruff could not be installed because the package download repeatedly failed due network/DNS errors. The codebase still has 4 FastAPI deprecation warnings for `on_event` startup/shutdown. A prior documentation check identified missing public docstrings; these were not mass-inserted automatically.

Sign-off: Core functionality, data outputs, API behavior, clustering, tests, dashboard and performance gates are validated. The documented exceptions should be reviewed before declaring a strict zero-exception release.
